

Breastfeeding Resources

Resources through AAMC:

Get your breastfeeding questions answered when you need help. When you're home, AAMC lactation consultants are available seven days a week via our WARMLine (443-481-6977). Consultants answer calls and emails between 9 am and 3 pm and respond within 24 hours. Our consultants can also help you find support resources in the community for ongoing in-person help and support.

Our triage team of nurses can also offer additional advice and support.
